

TOOLS REQUIRED:
ELECTRIC DRILL
RATCHET WRENCH
9/16" SOCKET

SURFACE MOUNT KIT

M A T E R I A L S

(4) 3/8" X 4" CONCRETE ANCHORS

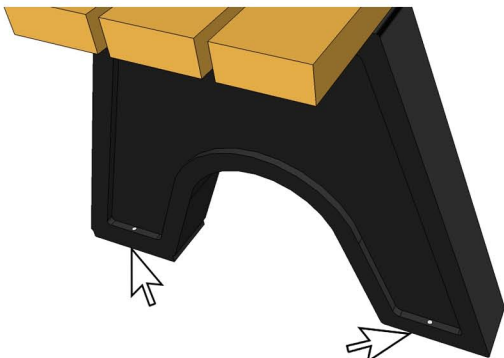

(1) 3/8" STANDARD DRILL BIT

(1) 5/16" CONCRETE DRILL BIT

I N S T R U C T I O N S

1. After making your bench and positioning it in place, drill a hole using the standard drill bit thru the base of the bench in four places. Two holes on one base and two on the other base. (see picture).
2. Having drilled all the way thru the base you should have a dimple mark on the concrete under the bench hole. Now using the concrete drill bit drill four holes in the concrete about 4 inch deep or length of the drill bit.
3. Now place the bench over the holes and line them up with the holes in the bench. Then screw in the concrete anchors.
