

CORNER GUARDS :: 121tc350

Made from industrial strength rubber, the wall mounted corner guards are a high-quality and safe solution to protect both workers and buildings. The corner guards are ideal for both indoor or outdoor use. They feature reflective orange safety stripes to alert workers at night or in poorly lit areas. Designed to not only alert workers about corners, but be durable enough to protect corners from damage during daily activities. Corner guards are best used in industrial settings, warehouses or loadings docks. Available in two different styles, we are sure to find the perfect corner guard to fit your requirements.

FEATURES

- Made from durable, molded rubber
- Reflective chevrons to increase visibility
- Six indentations uniformly located to make mounting a cinch
- Designed for indoor or outdoor use
- Increases safety in work environments
- Rounded corner easily deflects objects impacting surface
